Česká tradice a světový design spojen se značkou RAV SLEZÁK

Zabýváme se výrobou vodovodních baterií a koupelnových doplňků. Ve svém sortimentu nabízíme také sprchový program, sifony, rohové ventily apod.

Kvalita, inovace, design – to jsou základní charakteristiky výrobků RAV SLEZÁK. Všechny naše vodovodní baterie a koupelnové doplňky jsou vyrobené z vysoce kvalitní mosazi. Naše výrobky jdou vždy s trendem.

Na zakázku vyrábíme i přesné repliky baterií nebo repasujeme stávající pro rekonstrukce významných historických světových staveb.

RAV SLEZÁK vyrábí ve spolupráci s českým výrobcem křišťálu a bižuterie firmou Preciόza luxusní vodovodní baterie s broušeným českým křišťálem.

Nabízíme inovativní řešení, které zajišťuje šetření vody a snižuje náklady v domácnosti.

Czech tradition and world design trends are associated with the RAV SLEZÁK brand

We are manufacturer of the faucets and bathroom accessories. In our assortment we also offer shower sets, siphons, angle valves, etc.

Quality, innovation, design - these are the basic characteristics of RAV SLEZAK products. All our faucets and bathroom accessories are made of high quality brass. Our products always follow the current trends.

We also produce perfect reproduction of faucets bespoke or refurbish existing ones for the reconstruction of important world historical buildings.

RAV SLEZAK, in cooperation with the Czech manufacturer of crystal and jewellery, the company Precioza, produces luxury taps with faceted Czech crystal.

We offer an innovative solution that saves water and reduces household costs.

Technologie PVD

Jako první výrobce vodovodních baterií v ČR jsme zahájili vlastní výrobu vodovodních baterií a koupelnových doplňků s novou technologií PVD (Physical Vapor Deposition). Tato technologie umožňuje vytvořit vysoce kvalitní a trvanlivé povrchy s širokou škálou barev a vzhledů pro vodovodní baterie a koupelnové doplňky.

Povlakování PVD je proces, při kterém se ve vakuu odpařují mikročástičky pevné látky a pod vysokým tlakem se nanášejí na povlakovaný materiál. Odpařené mikročástičky se díky procesu spojí přímo s materiálem na který jsou nanášeny. Tato metoda je navíc velmi ekologická a povrchová vrstva je antialergická. PVD je také technologie s vynikajícími fyzikálními i chemickými vlastnostmi, vysokou tvrdostí, odolností vůči otěru, vysoké teplotě a korozi.

Povlakování PVD má řadu výhod, mezi které patří:

Vysoká tvrdost a odolnost vůči otěru - povrchy s povlakem PVD jsou mnohem odolnější proti poškrábání než bez povlaku.

Odolnost vůči korozi - povrchy s povlakem PVD jsou odolné vůči vodě, soli a dalším agresivním látkám.

Široká škála barev a vzhledů - povlakování PVD umožňuje vytvořit širokou škálu barev a vzhledů, které lze přizpůsobit individuálním potřebám zákazníků.

Momentálně nabízíme širokou škálu možností povrchové úpravy PVD pro vodovodní baterie a koupelnové doplňky. Mezi nejpopulárnější patří:

Z - ZLATÁ – lesklá

ZK - ZLATÁ – kartačovaná matná

ZRL - ZLATÁ RŮŽOVÁ – lesklá

ZRK - ZLATÁ RŮŽOVÁ – kartačovaná matná

MGL - METAL GREY – lesklá

MGK - METAL GREY – matná

Kromě těchto základních možností nabízíme také možnost vytvoření individuálních povrchových úprav podle specifických požadavků zákazníků.

Nové možnosti povrchové úpravy PVD otevírají nové možnosti pro design vodovodních baterií a koupelnových doplňků. Díky svým vlastnostem poskytují tyto povrchy vysoce kvalitní a trvanlivé řešení, které splní i ty nejnáročnější požadavky zákazníků.

Pro více informací o našich nových možnostech povrchové úpravy PVD nás neváhejte kontaktovat.

PVD Technology

We were the first faucets producer in the Czech Republic to start our own production of faucets and bathroom accessories with the new PVD (Physical Vapor Deposition) technology. This technology enables the creation of high-quality and durable surfaces with a wide range of colors and finishes for mixers and bathroom accessories.

PVD coating is a process where solid material micro-particles are vaporized in a vacuum and deposited onto the coated material under high pressure. The vaporized micro-particles bond directly with the material they are applied to. Additionally, this method is highly environmentally friendly, and the surface layer is hypoallergenic. PVD is also a technology with excellent physical and chemical properties, high hardness, resistance to abrasion, high temperatures, and corrosion.

PVD coating has numerous advantages, including:

High hardness and abrasion resistance - PVD-coated surfaces are much more resistant to scratching than uncoated surfaces.

Corrosion resistance - PVD-coated surfaces are resistant to water, salt, and other aggressive substances.

Wide range of colors and finishes - PVD coating allows for a wide range of colors and finishes that can be customized to individual customer needs.

We currently offer a wide range of PVD surface treatment options for mixers and bathroom accessories, including the most popular ones:

Z - GOLD – polished

ZK - GOLD – brushed matt

ZRL - GOLD ROSE – polished

ZRK - GOLD ROSE – brushed matt

MGL - METAL GREY – polished

MGK - METAL GREY – brushed matt

In addition to these basic options, we also offer the possibility of creating custom surface treatments according to specific customer requirements.

The new PVD surface treatment options open up new possibilities for the design of mixers and bathroom accessories. With their properties, these surfaces provide high-quality and durable solutions that meet even the most demanding customer requirements. For more information about our new PVD surface treatment options, feel free to contact us.

Vila Tugendhat

Společnost Slezák-RAV CZ s.r.o. vyrobila v období let 2011–2012 na základě dobových fotografií, pořízených v třicátých letech minulého století, repliky vodovodních baterií do vily Tugendhat, která je od roku 2001 zapsána na seznam kulturního dědictví UNESCO. Vila manželů Greta a Fritze Tugendhatových z let 1929–1930, navržená Ludwigem Miesem van der Rohe se nachází v Brně a je významnou památkou moderní architektury v České republice.

Vila Tugendhat

Company Slezák-RAV CZ s.r.o. manufactured in 2011–2012 replicas of original water faucets into villa Tugendhat, Brno by authentic photos made in villa in the 30s of the last century. Villa Tugendhat has been listed on the UNESCO World Heritage List since 2001. Villa of couple Greta and Fritz Tugendhat from 1929s–1930s, designed by Ludwig Miese van der Rohe is located in Brno and is remarkable monument of architecture in Czech republic.

Vila Stiassni

V letech 2013–2014 společnost Slezák-RAV CZ s.r.o. vyrobila repliky a repasovala původní vodovodní baterie do prvorepublikové vily Stiassni v Brně, postavenou v třicátých letech minulého století významným brněnským architektem Ernstem Wiesnerem, pro textilního továrníka Alfreda Stiassni. Vila je známá také jako „vládní vila“ pro její poválečné využití např. prezidentem Edvardem Benešem.

Vila Stiassni

In the 2013–2014 company manufactured and rebuilt replicas of faucets for villa Stiassni, Brno. Villa was built in 30s last century by significant architect Ernest Wiesner, for textile factory owner Alfred Stiassni. Villa is also famous as „government villa“ for her post-war use, for example by president Edvard Benes.

POMŮŽEME VÁM SNÍŽIT SPOTŘEBU VODY A UŠETŘIT DOMÁCÍ ROZPOČET WE WILL HELP YOU TO REDUCE WATER CONSUMPTION AND SAVE FAMILY BUDGET

ECO PUSH Šetřete vodu i přírodu – díky chytrým bateriím s ECO perlátorem

Objevte výhodu našich moderních umyvadlových baterií s ECO perlátorem s nízkým průtokem! Díky této technologii snižíte spotřebu vody o více než 50 % – bez kompromisů v komfortu. Perlátor provzdušňuje proud vody, což zajišťuje příjemné mytí rukou i úsporu vody s každým použitím.

Myslete ekologicky i ekonomicky – Menší spotřeba vody znamená méně energie na ohřev, nižší účty za vodu i elektřinu a hlavně menší dopad na životní prostředí. Každá kapka, kterou ušetříte, má smysl – pro vaši domácnost i naši planetu.

Úspora, styl a udržitelnost – v jedné baterii.

Save Water and the Environment – with smart faucets with ECO Aerators

Discover the benefits of modern washbasin faucets with ECO aerators! Thanks to this innovative technology, you can reduce water consumption by more than 50 % – without sacrificing comfort. The aerator enriches the water stream with air, ensuring a pleasant hand-washing experience while saving water with every use.

Think green and save money – Lower water usage means less energy needed for heating, lower water and electricity bills, and most importantly – a smaller environmental footprint. Every drop you save makes a difference – for your home and for our planet.

Efficiency, style, and sustainability – all in one faucet.

Jen pro srovnání průtoky vody | Just for comparison the water flows

COSMO ECO

Další možnost ušetřit je nová sprcha od naší firmy **COSMO ECO**, objednávací kód je **PS0024**. Tato ruční sprcha přispěje ke **snížení spotřeby vody při sprchování na 50%**. Regulace spotřeby vody je v rukojeti sprchy. Tato sprcha má 5 režimů a je masážní. Funkce **EASY Clean** dovolí jednoduše vyčistit sprchu od vodního kamene. Díky speciální konstrukci se dá jednoduše otevřít a vyčistit od nečistot. Str. 213

Another way to save is the new shower **COSMO ECO** from our company, product code is **PS0024**. This hand shower will help you to **reduce the water consumption during showering to 50%**. The water consumption control is in the shower handle.

This shower has got 5 modes and is a massage. The **EASY Clean** function allows you to easily clean the shower of lime scale.

Thanks to the special construction, it's easier to open the shower and clean from dirt. P. 213

PS0054

Již při prvním použití ruční sprchové růžice pocítíte výraznou změnu. Díky **mikro dírkám**, které jsou vypáleny pokročilou laserovou technologií, i slabý proud vody vytvoří ideální tlak a ze sprchování se stane výjimečný zážitek, při kterém spotřeba je 6l/min, **ušetříte až 50% běžné spotřeby vody**.

Filtrační sprcha obsahuje **3 druhy bioaktivních minerálních kamenů**, které **eliminují chlór ve vodě, zajišťují správnou cirkulaci a provzdušnění vody a také její rovnoměrnou distribuci do všech trysek sprchy**. V neposlední řadě díky nim nedochází k ucpání trysek vodním kamenem a i v případě velmi tvrdé vody je sprcha jednoduše rozebiratelná, kvůli snadnému čištění. Str. 211

Thanks to the micro holes, which are burned by advanced laser technology, even a weak stream of water creates an ideal pressure and showering becomes an exceptional experience, **saving up to 50% of normal water consumption**.

The filter shower contains **3 types of bioactive mineral stones**, which **eliminate chlorine in the water, ensure proper circulation and aeration of the water, as well as its even distribution to all nozzles of the shower**. Last but not least, thanks to them, the nozzles do not become clogged with limescale and even in the case of very hard water, the shower is easy to disassemble, for easy cleaning. P. 211

KDE MŮŽETE NAJÍT NAŠE PRODUKTY

WHERE YOU CAN FIND OUR PRODUCTS

Cu+Zn 1. Na naše výrobky, které přicházejí do styku s vodou, používáme vysoce kvalitní mosaz s důrazem na vysoké hygienické normy. Použitím kvalitní mosazi zaručujeme dlouhou životnost i při prudkých změnách teplot a vylučujeme korozi výrobku. Na základě těchto vysokých požadavků garantujeme těsnost odlitku těla vodovodních baterií desetiletou zárukou.

For our products, that get in touch with water, we use high-quality brass with accent on strict hygiene norms. High-quality brass guarantees a long-life, even while rapid temperature changing and excludes corrosion. Thanks to these strict requirements we guarantee a tightness of a body of a water tap with 10 years.

2. **Povrchová úprava**
Chrom – Chromování je dvojitý elektrochemický proces, při kterém se nanáší min. 12µm niklu na mosazný materiál, k docílení jeho korozivní odolnosti. Druhou vrstvou je dekorativní chrom o min. síle min. 5 µm pro požadovaný vysoký lesk výrobku.

Zlato – Pro zlacení výrobků se do procesu chromování přidá třetí vrstva titanu.

Stará mosaz – Mosazné tělo připravujeme v chemické lázni pro následné kartáčování, kterým vytvoříme požadovanou patinu. Pro dosažení výsledného lesku je finálním povrchem bezbarvý lak, následně vypálený v peci.

Barevné baterie – Lakovaný povrch na těle baterií je speciální barva odolná změnám teplot a je vhodná do vlhčího prostředí koupelen.

Surface dressing

Chrome – Chroming is a double electrochemical process, during which we cover a brass surface by 12µm of nickel at least for achievement of corrosion resistance. The second layer is 5 µm of decorative chrome for required shine of the product.

Gold – For gilding we add a third layer of titan, while chroming.

Bronze – For brushing we put an old brass body in a chemical bath. By brushing we get a needed patina. For final achievement of a strong shine we put the last layer – colourless varnish, later burned in an oven.

Coloured faucets – The painted surface on the body of faucet is a special color resistant to temperature changes and is suitable for humid environments in bathrooms.

3. Keramické kartuše a vršky zaručují dlouhou životnost, tichý chod vody a komfortní ovládání vodovodních baterií. Vodovodní baterie osazujeme kartušemi maďarského výrobce Kerox nebo španělského výrobce Sedal. V retro bateriích naleznete špičkové německé vršky Fluesh.

Ceramic cartridges and caps guarantee long-life, silent water flow and comfort handling of water taps. They contain Hungarian cartridges Kerox or Spanish cartridges Sedal. In retro water taps they are first-rate German caps Fluesh.

4. Plastové perlátory v mosazném pouzdře jemně provzdušňují proud vody a i při nižším tlaku je dosaženo potřebné účinnosti. Řadu Loira a Seina osazujeme švýcarským antivápenným perlátorem Neoperl s gumou, pro snadné čištění případných usazenin vápence.

Plastic aerators with brass sleeve gently aerate water flow, what means that effectiveness is reached even during lower consumption. Loira and Seina series contain a Swiss aerator with rubber ring for easy cleaning of limestone.

5. Nástěnné vanové baterie jsou opatřené mechanickou fixací přepnutí pro případ nízkého tlaku ve vodovodním řádu. Baterie vybavené keramickým přepínačem problém s nízkým tlakem eliminují. Vodopádové baterie jsou vybaveny speciálním ventilem, případně keramickým přepínačem, dle typu baterie.

Wall-mounted bath lever mixers have mechanical fixation of switching for a case of low water pressure. Bath mixers with ceramic switchers eliminate problem with the low pressure. Cascade water faucets have a special valve or a ceramic switcher (depends on a type of faucet).

6. Termostatické baterie v předem nastaveném poměru směšují teplou a studenou vodu. Maximální přednastavenou teplotu 38 stupňů reguluje francouzská termostatická kartuše. Pro případné dosažení vyšší teploty, je ventil osazen mechanickým bezpečnostním tlačítkem, pro vyloučení rizika opaření. Výhodou termostatické baterie je rychlejší dosažení požadované teploty a tím i nižší energetické zatížení pro samotný ohřev vody.

After previous settings thermostatic water taps mix warm and cold water. Maximal preset temperature 38 grades is regulated by a French thermostatic cartridge. For eventual reaching of a higher temperature the valve has a special mechanical safety button to eliminate the risk of scalding. The advantage of thermostatic water taps is a fast reaching of needed temperature so less energy load for heating itself.

7. Pro připojení stojánkových baterií k vodovodnímu řádu dodáváme flexibilní hadičky s nerezovým opletem, tzv. flexi, nebo pancéřovky. Hadičky jsou běžně opatřeny vnějším závitem M10x1 nebo M12x1 a na straně rohového ventilu G3/8" běžným v ČR. Hadičky nabízíme i se závitem G1/2".

V zakázkové výrobě vyrábíme flexi i v povrchové úpravě „Zlato“ a „Stará mosaz“.

Dřezové baterie s vytahovací sprchou mají hadice opatřené silikonovým opletem pro tichý chod a delší životnost. Vanové vodopádové baterie mají sprchovou hadici opatřenou vratnou nerezovou pružinou, která oproti konstrukci se závažím, nabízí větší využitelnost délky hadice.

For connecting of water faucets we sell flexible hoses with stainless steel braid, called flexi. The hoses have a thread M10/1 or M12/1 and on the side of angle valve G3/8" common in Czech republic. Hoses we offer with thread G1/2 or custom-made with gold surface or bronze surface. Kitchen water faucets with pulling out shower have hoses with silicone tubing for silent water flow and long life. Cascade bath lever mixers have shower hose with a spring from stainless steel, which enable more usability of the hoses length.

8. Sprchové růžice jsou opatřené antivápenou úpravou pro snadnější čištění od případných usazenin vápence. Vyjimku tvoří tzv. retro kolekce (z důvodu vzhledu) a konstrukce samotné růžice.

Hand showers have an anti-limestone jets for easy cleaning of potential sediment. Only exception is so called retro collection (because of the design of the products) and a construction of the hand shower.

9. Výkresy a fotografie jsou pouze orientační. Případné změny nemají vliv na funkčnost výrobku. Aktuální jsou ke stažení na RAVSLEZAK.CZ, nebo k vyžádání na konstrukce@slezak-rav.cz.

Drawings and photographs are just approximate. Potential changes don't have influence on a functionality of the products. Current ones are available on our website: RAVSLEZAK.CZ or you can ask on it by email: konstrukce@slezak-rav.cz.

10. Údržba – Pro čištění vodovodních baterií používejte čisticí přípravky bez abraziv

(brusných látek), vhodné jsou speciální čisticí prostředky na odstranění vodního kamene. Přípravek nesmí obsahovat látky na bázi aktivního chloru, kyselin a octa. Baterie po čištění omyjte vodou a osušte.

Service – For water faucets cleaning use detergents without abrasives (grinding material). You can use special detergents against scale. The detergents cannot contain an active chlorine, acids or vinegar. After cleaning of water faucets clean it again by water and dry up.

Prodloužená záruka na jmenované:

Těsnost odlitku těla baterie – 10 let

Kartuše KEROX, SEDAL a povrchová úprava vodovodní baterie chrom, zlato – 6 let

Na termostatickou kartuši, povrchovou úpravu stará mosaz, lakované baterie a ostatní díly záruka dle Občanského zákoníku – 2 roky

Zakázková výroba:

Na výrobky z kolekce RETRO, PREMIUM a na lakované baterie je z důvodu vyšší náročnosti na zpracování, popřípadě ruční výrobu prodloužený termín dodání na 2–6 týdnů.

Longer warranty on:

Tightness of bodies of water taps – 10 years

Cartridge KEROX and SEDAL and chrome or gold surface of a water tap – 6 years

Thermostatic cartridge, cap, bronze, white surface and other parts warranty according the Czech civil code – 2 years

Custom-made offer:

Products of series RETRO and PREMIUM have (because of demanding character of processing and handmade production) longer term of delivery 2-6 weeks.

Reklamace

Jak řešit reklamaci?

Kontaktuje nás emailem.

Email musí obsahovat:

1. jméno a označení výrobku
2. popis závady (např. teče voda pod pákou, nepřepíná mezi sprchou a vanou, vizuální vada)
3. datum zakoupení výrobku s číslem faktury, nebo číslem dokladu, účtenky
4. kopii, scan popř. fotografii dokladu o nákupu výrobku
5. pokud je vada kosmetická, fotografii vady
6. vaši kontaktní adresu s telefonním číslem

O zahájení reklamačního řízení Vás budeme informovat do 3. pracovních dnů, pokud se tak nestane, zavolejte nám, je možné, že jsme Váš email neobdrželi.

Nebo nám **zavolejte** v pracovních dnech od 7:00–15:30 hod na telefonní číslo reklamačního oddělení +420 575 114 489, nebo na mobilní telefon +420 725 957 259

Na vyřízení reklamace máme dle zákona o ochraně spotřebitele 30 dnů po obdržení reklamovaného výrobku, uděláme maximum, aby jsme tuto dobu co nejvíce zkrátali.

Reklamovaný výrobek musí být čistý a v případě zaslání poštou i řádně zabalený, aby nedošlo k poškození. Poškození vlivem nevhodného balení, nebo přepravy není důvodem k uplatnění reklamace.

Výrobek zaslaný poštou označte jako: „REKLAMACE“.

Důležitý je průvodní dopis, který musí mít stejné náležitosti email. (viz. výše)

Reklamace se nevztahuje na:

Závada vzniklá neodbornou montáží

Závada vzniklá mechanickým poškozením, nebo nešetrným používáním

Závada špatnou údržbou, např. poškození laku abrazivy, chemickými prostředky

Závada vzniklá nad rámec běžného používání, nebo v extrémních podmínkách

Závada vzniklá nečistotami z vodovodního řádu, kvalitou, nebo tvrdostí vody

Výrobky s udanou vadou na kterou byla při prodeji poskytnuta sleva (2. jakost)

V případě Vašich dotazů nás neváhejte kontaktovat pondělí – pátek od 7:00 hod – 15:00 hod

Servisní oddělení

Slezák-RAV CZ s.r.o.

Příčná 1219/1b

772 00 Olomouc

Česká republika

Telefon: +420 585 114 489

Mobil: +420 725 957 259

Email: servis@slezak-rav.cz

Náležitosti

!!! Upozornění !!!

Baterie musí být řádně zabalena a krabice vyložena, aby baterie byla chráněna proti pohybu při dopravě. Používejte speciální vycpávky určené přímo k těmto účelům nebo jiné podobné materiály.

Tímto docílíte bezpečné přepravy a předejdete následným škodám, které by mohly vzniknout skrze dopravu a na které nebude brán zřetel. Dále baterie musí být očištěna. Pokud takto nebude provedeno, náš servis spraví jen závadu, která je reklamována.

Vzor jak má reklamace vypadat:

Pokud reklamace nebude obsahovat níže uvedené náležitosti, budeme ji brát jako nekompletní a tudíž neřešitelnou!!!

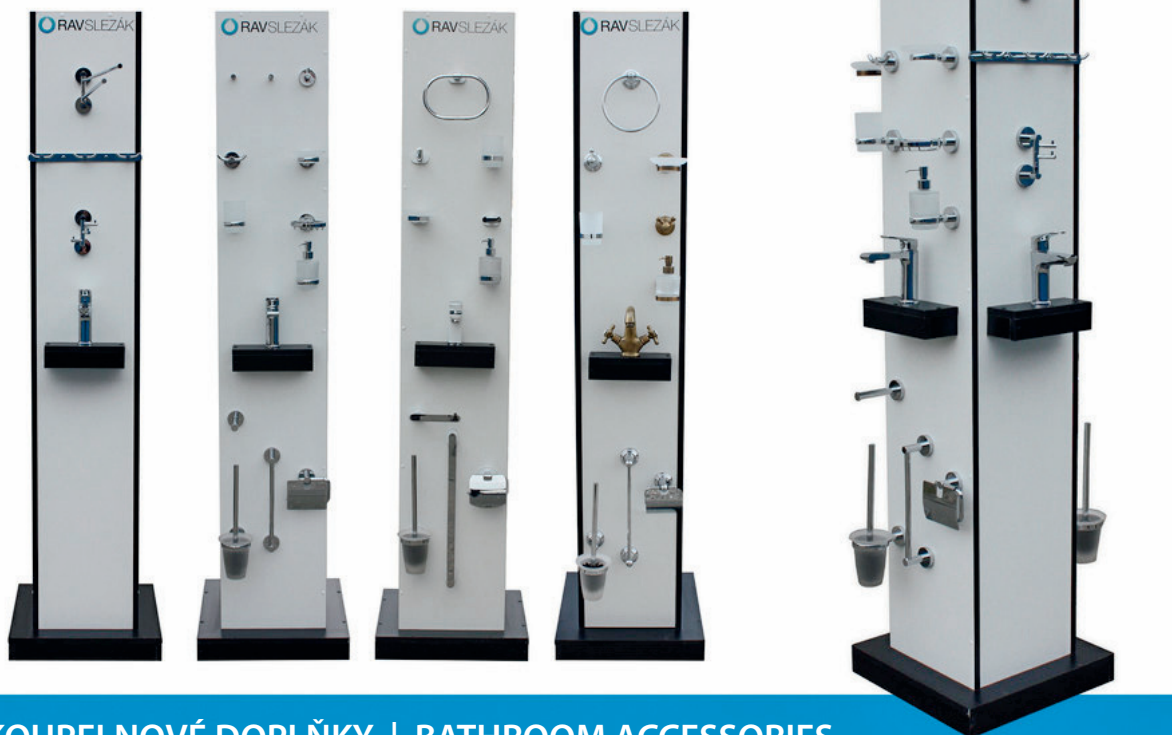

Příklad

- 1) Jméno a příjmení: Martin Novák
- 2) Adresa: Lomená 1513/2c
- 3) Tel. Číslo: +420 773 551 123
- 4) Email: mnovak@gmail.com
- 5) Číslo DL nebo faktury: č. fa. 15015979 nebo č. dl. 1507086
- V případě, že nevíte č. fa. nebo č. dl. prosíme o naskenovaný doklad o koupi**
- 6) Název produktu: LR527.0KZ
- 7) Popis závady musí být přesně popsán:
 - a) baterie protéká u páčky/kohoutku.
 - b) baterie má poškrábanou páčku/ vada povrchu na ramínku
 - c) baterie při spuštění teče vypustí i sprchou
 - d) atd.

Vzor jak nemá reklamace vypadat:

- 1) Jméno a příjmení: Martin
- 2) Adresa: Lomená
- 3) Tel. Číslo:
- 4) Email:
- 5) Číslo DL nebo faktury:
- 6) Název produktu: baterie dřezová Sázava s dlouhým ramínkem
- 7) Popis závady:
 - a) baterie teče
 - b) baterie je poškrábaná
 - c) baterie nefunguje, tak jak má
 - d) atd.
